

William James College is a higher Education Institution specialized in Neurosciences and the handling of patients with mental pathologies. Up to the moment fourteen students have benefitted from the Agreement between la Junta de Beneficencia and the William James Collage from Boston which allows psychology Postgrad Medical students to perform assistantships for a month at the Neurosciences Institute (Inc.) with a purpose to interchange knowledge and become acquainted with the Mental Health Plan applied to patients standing out fundamentally the humane treatment received from the Inc. Professionals.

Students rotate through the hospitalization areas, the addictive behavior unit and residences where they interchange experiences, having learned that beyond medicine patients need warmth and affection which, because of cultural differences, does not form part of the attention model in other countries.

The Agreement undersigned on Wednesday August 1st Between Eng. Ernesto Noboa and Dr. Nocholas Covino, Junta Director and William James Collage President, a Higher Learning Institution specialized in Neurosciences and handling of patients with mental pathologies also opens an opportunity for Institute Professionals to have access to upgrade up-to-date different processes, technical skills and psychological therapies at William College besides furthering training and research together.
