

As part of an action of gratitude, Oscar Ledesma, Manager of Proledexport, donated biosafety supplies and implements that will serve as protection for the health personnel in our hospitals.

118 disposable gowns, 1 thermal video surveillance camera, 850 pairs of surgical gloves, 2,100 disposable masks, 26 disposable coveralls, 50 digital thermometers were given.

It is the second donation that Ledesma makes to JBG, motivated by the gratitude for the health care that his mother received, last year, at the Luis Vernaza Hospital. "We must value the enormous work that the Junta de Beneficencia de Guayaquil has been doing, not only in this pandemic, but for decades" he said.
