

This week we donated nebulizers, diapers, and 11 mobility aids to improve the quality of life of children and adults who suffer disabilities. The beneficiaries had contacted us by our digital channels.

One of the beneficiaries was 7-year-old Ana, who suffers from epilepsy and mobility problems due to a tumor in her brain. Silvia Rodríguez, her mother, explains how difficult it is to mobilize her for consultations and therapies. She received diapers, a nebulizer, and a wheelchair. "I am very grateful to God and to you who have helped us," she said.

Eduardo Romero, on behalf of the Junta de Beneficencia de Guayaquil, explained that during this year, the technical aid program, in alliance with local and international cooperators, has improved the mobility of 607 people, thanks to the donation of canes, crutches, and wheelchairs. "We have worked in a coordinated way with 28 Foundations in the country for these share the same values as ours" he said.
